

PRODUCT DEVELOPMENT

Naturn Usva -

Subtle elegance with a modern nuance

Naturn Usva urn follows traditional lines with a soft modern Nordic touch. The material has a natural ceramic/wood feeling and the structure of the urn is designed to use as little resources as possible.

Usva has a convenient screw lid so it is simple to seal the urn. Later on, the lid can be opened easily for scattering the ashes. The lid does not require any harmful glue or extra screws to be locked.

Optional nameplate is individually customizable. Customer can choose between a copper and a birch plate and unique engraving will make the urn itself a beautiful memory product. Nameplate will fit tightly to the slot in the lid but it can also be removed when the urn is buried underground.

ABOUT THE MATERIAL

- Naturn urns are made of Sulapac, fully plant based material. Finnish innovation which will not cause any harm or leave anything permanent to nature even when buried underground.
- 100% bio-based
